This iPad interactive book is an indispensable tool for pilots seeking the Airbus A320 type rating. This study guide offers an in-depth systems knowledge with pictures, videos and schematics not found in other publications. It is packed with detailed and useful information to prepare any candidate for command and responsibility of the A320 equipped with IAE or CFM engines.

Captain John A. Moktadier graduated and received his Bachelor's Degree from Embry-Riddle Aeronautical University in Daytona Beach, Florida. He has been flying for the past 35 years and currently holds both a Gold Seal Flight Instructor and Advanced Ground Instructor licenses from the FAA. Capt. Moktadier has four type ratings which include: Airbus 330, Airbus 320, Boeing 747 and Boeing 727. He has logged over 24,000 hours flight time with the majority of his hours in jet transport and wide body aircraft. He has flown around the world. Captain Moktadier served as a Boeing 727 Check Airman (TRE) and conducted rating rides, proficiency checks, instructions and simulator checks and line checks for over 10 years with a commercial airline in the United States. He has trained hundreds of pilots with no failures and well above average results. The pilots he has trained have lots of respect for Capt. Moktadier's knowledge and his training style made them feel relaxed during the entire simulator session maximizing their learning due to his teaching ability, honesty and integrity. They have all commented that he is a true professional

Read Online A330 Study Guide

instructor and TRE. This is his second book that he has published. The first one was Boeing 727 Flight Master which received many outstanding and excellent reviews and positive feedback from the professionals in the airline industry who read the book and it soon became one of the best training books on a Boeing 727.

The most comprehensive coverage to date of Air France 447, an Airbus A330 that crashed in the ocean north of Brazil on June 1, 2009, killing all 228 persons on board. Written by A330 Captain, Bill Palmer, this book opens to understanding the actions of the crew, how they failed to understand and control the problem, and how the airplane works and the part it played. All in easy to understand terms. Addressed are the many contributing aspects of weather, human factors, and airplane system operation and design that the crew could not recover from. How each contributed is covered in detail along with what has been done, and needs to be done in the future to prevent this from happening again. Also see the book's companion website: UnderstandingAF447.com

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.

The author of *The Sporty Game* journeys behind the scenes to examine the high-stakes rivalry between the world's two largest aircraft manufacturers--Boeing and Airbus--drawing on interviews with industry insiders to reveal how Boeing lost its edge in the marketplace and what it is doing to reclaim its status. Reprint. 20,000 first printing.

Airline pilots often have to face sudden, unexpected situations that can become potentially dangerous. They are trained to deal with these situations, but sometimes the lack of time before the situation deteriorates and the associated stress can compromise their basic cognitive sequence and lead to a serious incident or even an accident. This book

Effective radio communication between ATC and pilots has long been recognized as an important element of aviation safety. In recognition of the role miscommunications play in aviation incidents and accidents, the International Civil Aviation Organization (ICAO) recently introduced language proficiency requirements for all flight personnel in all ICAO member states. Using an effective and economical experimental paradigm, the research described here teases apart the complex combination of factors (e.g. speech rate, controller message length, English language proficiency, cognitive workload) believed to contribute to miscommunications between controllers and pilots. *Misunderstandings in ATC Communication* offers an in-depth report of a

Read Online A330 Study Guide

seminal study in aviation communication, which until now has only been available in the form of an unpublished dissertation. In addition, it offers a recent extension of that work, the authors' reflections on the research process, and a thorough review of the aviation communication literature. Graduate students and researchers who wish to address real-world problems will appreciate the simple elegance of the experimental paradigm that has been used to address a wide range of theoretical and applied interdisciplinary research questions. The book will appeal to scholars in the fields of human factors, linguistics, cognitive psychology, applied linguistics and second-language education and assessment. It is also of direct relevance to government and industry decision-makers and operators as they strive to implement the ICAO requirements, and to improve aviation safety.
