Resource | RSC Education

An acid-base titration is a neutralization reaction that is performed in the lab in order to determine an unknown concentration (Molarity) of acid or base. As long as the concentration of one of the solutions is known, the concentration of the other reaction can

File Type PDF Acid Base Titrations Chem Worksheet

to be obtained through titration. In a titration reaction, the moles of acid equal the moles of base at the equivalence point.

$$\underline{M_a V_a = M_b V_b}$$

Acid-Base titrations are usually used to find the amount of a known acidic or

File Type PDF Acid Base Titrations Chem Worksheet

basic substance through acid base reactions. The analyte (titrand) is the solution with an unknown molarity. The analyte (titrand) is the solution with an unknown molarity.
