STEEL DESIGN covers the fundamentals of structural steel design with an emphasis on the design of members and their connections, rather than the integrated design of buildings. The book is designed so that instructors can easily teach LRFD, ASD, or both, time-permitting. The application of fundamental principles is encouraged for design procedures as well as for practical design, but a theoretical approach is also provided to enhance student development. While the book is intended for junior-and senior-level engineering students, some of the later chapters can be used in graduate courses and practicing engineers will find this text to be an essential reference tool for reviewing current practices. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A fierce war rages for your soul. Are you ready for battle? Like it or not, you are at war. You face a powerful enemy out to destroy you. You live on the battlefield, so you can't escape the conflict. It's a spiritual war with crucial consequences in your everyday life and its outcome will determine your eternal destiny. You must engage the Enemy. And as you fight, you need a Manual for Spiritual Warfare. This guide for spiritual warriors will help you recognize, resist, and overcome the Devil's attacks. Part One, "Preparing for Battle," answers these critical questions: • Who is Satan, and what powers does he have? • What are his typical strategies? • Who fights him alongside us in battle? • What spiritual weapons and armor do we possess? • How do we keep the Enemy out of our camp? Part Two, "Aids in Battle," provides you these essential resources: • Teaching about spiritual warfare from Scripture and Church documents • Scripture verses for battle • Wisdom and inspiration from saints who fought Satan • Prayers for protection, deliverance, and victory • Rosary meditations, hymns, and other devotions for spiritual combat St. Paul urges us to "fight the good fight of the faith" (1 Tim 6:12). Take this Manual for Spiritual Warfare with you into battle. The beautiful Premium UltraSoft gift edition features sewn binding, ribbon marker and silver edges.

CD-ROM contains full text for all the procedures available in the manual. Files are provided both as fully formatted Word 6.0 (.doc) documents and as text-only documents (.txt).

Autobiography has seen enormous expansions and challenges over the past decades. One of these expansions has been in comics, and it is an expansion that pushes back against any postmodern notion of the death of the author/subject, while also demanding new approaches from critics. Drawing from Life: Memory and Subjectivity in Comic Art is a collection of essays about autobiography, semiautobiography, fictionalized autobiography, memory, and self-narration in sequential art, or comics. Contributors come from a range of academic backgrounds including English, American studies, comparative literature, gender studies, art history, and cultural studies. The book engages with well-known figures such as Art Spiegelman, Marjane Satrapi, and Alison Bechdel; with cult-status figures such as Martin Vaughn James; and with lesser-known works by artists such as Frédéric Boilet. Negotiations between artist/writer/body and drawn/written/text raise questions of how comics construct identity, and are read and perceived, requiring a critical turn towards theorizing the comics' viewer. At stake in comic memoir and semi-autobiography is embodiment. Remembering a scene with the intent of rendering it in sequential art requires nonlinear thinking and engagement with physicality. Who was in the room and where? What was worn? Who spoke first? What images dominated the encounter? Did anybody smile? Man or mouse? Unhinged from the summary paragraph, the comics artist must confront the fact of the flesh, or the corporeal world, and they do so with fascinating results.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Beginning computing students often finish the introduction to programming course without having had exposure to various system tools, without knowing how to optimize program performance and without understanding how programs interact with the larger computer system. Adam Hoover's System Programming with C and Unix introduces students to commonly used system tools (libraries, debuggers, system calls, shells and scripting languages) and then explains how to utilize these tools to optimize program development. The text also examines lower level data types with an emphasis on memory and understanding how and why different data types are used.

Within this 333-page guidebook, you will find the knowledge and practical steps upon implementation can help one achieve a natural state of abundance and experience conscious expansion. While other books focus on the "the secret" of the law of attraction, you will learn that there is far more available to you than material possessions and societal status. Inside these pages are revealed tools readily available to you that you may not even be aware of. This book is organized around the Mind, Body, and Spirit-the three spheres of being that need to operate in equilibrium for true knowledge of self, accelerated self betterment and the manifestation of desire. Written from a state of enlightenment reached only after deep meditation and facing life's many hardships, this guidebook presents full details of the metaphysical aspects of the mind and thoughts, the ego and self-identification, presence and creation, mindfulness, the anatomy of fear, chakra energy systems and healing, exercise and well-being, mineral-supplemented diets, along with the benefits of juicing, detoxing, clean eating, and living on a plant-based diet.

Gill's tarot pack is based on the structure of "The Tree of Life". Much of the imagery in "The Gill Tarot Deck" draws from passages in classical religious literature. "The Gill Tarot" by Elizabeth Josephine Gill presents 78 stunning full-color pictures which enable the reader to see his or her own reflection of life.
