Textbook Summary. At the university-level, the basics of biology are anything but basic. Luckily, Campbell Biology 11th Edition answers this problem by providing a solid foundation to help you progress into more complicated concepts. By starting with the smallest building blocks of what makes life possible, the text allows students to gradually move into the bigger topics of evolution, biological diversity, plant and animal form and function, and finally, their applications into the greater ...

Campbell Biology 7th Edition Study Guide Answers | www ...

Answer. 1. "An organelle is made of molecules collectively performing a specialized function" (Explanation: Organelles are structures made of molecules that perform a task. For example, chlorophyll in chloroplasts plays the role of the primary pigment during photosynthesis. Chemical reactions and interactions between different molecules in organelles allow the organelle to perform its function, which is producing glucose in this case.)
