In *Capitalism and Slavery*, Eric Williams argued that the declining economies of the British West Indies led to the abolition of the slave trade and of slavery. More recent research has rejected this conclusion; it is now clear that the colonies of the British Caribbean profited considerably during the Revolutionary and Napoleonic Wars.

Revolution and the decline of slavery in  
Great Britain.

The present study is an attempt to place in historical perspective the relationship between early capitalism as exemplified by Great Britain, and the Negro slave trade, Negro slavery and the general colonial trade of the seventeenth and eighteenth centuries. It is strictly an economic study of the role of Negro slavery and the slave trade in providing the capital which financed the Industrial Revolution in England and of mature industrial capitalism in destroying the slave system.

Williams early 19th century. Annotation c. Book News, Inc., Portland, OR (booknews.com).

Born in Trinidad, Eric Williams (1911-81) founded the Republic of Trinidad and Tobago's first modern political party in 1956, led the country to independence from the British culminating in 1962, and became the nation's first prime minister. Before entering politics, he was a professor at Howard University and wrote several books, including the classic *Capitalism and Slavery*. In the first scholarly biography of Williams, Colin Palmer provides insights into Williams's personality that illuminate his life as a scholar and politician and his tremendous influence on the historiography and politics of the Caribbean. Palmer focuses primarily on the fourteen-year period of struggles for independence in the

Williams Caribbean. From 1956, when Williams became the chief minister of Trinidad and Tobago, to 1970, when the Black Power-inspired February Revolution brought his administration face to face with a younger generation intellectually indebted to his revolutionary thought, Williams was at the center of most of the conflicts and challenges that defined the region. He was most aggressive in advocating the creation of a West Indies federation to help the region assert itself in international political and economic arenas. Looking at the ideas of Williams as well as those of his Caribbean and African peers, Palmer demonstrates how the development of the modern Caribbean was inextricably intertwined with the evolution of a regional anticolonial consciousness.

Eric Williams's 1944 thesis, Seymour Drescher argues that Britain's abolition of the slave trade in 1807 resulted not from the diminishing value of slavery for Great Britain but instead from the British public's mobilization against the slave trade, which forced London to commit what Drescher terms "econocide." This action, he argues, was detrimental to Britain's economic interests at a time when British slavery was actually at the height of its potential. Originally published in 1977, Drescher's work was instrumental in undermining the economic determinist interpretation of abolitionism that had dominated historical discourse for decades following World War II. For this second edition, which includes a foreword by David Brion Davis, Drescher has written a new preface, reflecting on the historiography of the British slave trade since this book's original publication.

The Economic Consequences of the Atlantic Slave Trade shows how the West Indian slave/sugar/plantation complex, organized on capitalist principles of private property and profit-seeking, joined the western hemisphere to the international trading system encompassing Europe, Africa, North America, and the Caribbean, and was an important determinant of the timing and pattern of the Industrial Revolution in England. The new industrial economy was no longer dependent on slavery for development, but rested instead on investment and innovation. Solow argues that abolition of the slave trade and emancipation should be understood in this context.
