Linda Colley's *Captives: Britain, Empire and the World, 1600-1850* looks at the history of British imperialism from an entirely novel perspective. Instead of concentrating on the familiar tales of those who got away with empire--emigrants, fortune-hunters, generals, missionaries and statesmen--she focuses on the narratives of those British men, women and children who were captured.

The later strength of the British Empire has often veiled its early weaknesses, both actual and perceived. In Captives, Linda Colley tackles one aspect of this, Britons in captivity, focusing on the captivity narratives they produced and their reception. She covers three periods: North Africa in the 17th and 18th centuries, North America up to and including the American Revolution, and India and Afghanistan from around 1760 to 1840.

Captives: Britain, Empire and the World is a fascinating look at the precarious nature of empire building and the hazards inherent in constructing and maintaining dominion over vast regions of land and people far from the seat of power. It is also the story of how ordinary people play a role in empire building and it shows that without the sacrifice of so many everyday lives the British would never have been able to hold sway over one fifth of the global population.

Some of the captives I'm looking at are British and Irish people, taken captive by the forces of the Ottoman Empire, which in the seventeenth century and for part of the eighteenth century was more powerful than the British Empire, sprawling over parts of Asia, Eastern Europe and North Africa.
