In this much-expanded second edition, author Yair Shapira presents new applications and a substantial extension of the original object-oriented framework to make this popular and comprehensive book even easier to understand and use. It not only introduces the C and C++ programming languages, but also shows how to use them in the numerical solution of partial differential equations (PDEs). The book leads readers through the entire solution process, from the original PDE, through the discretization stage, to the numerical solution of the resulting algebraic system. The high level of abstraction available in C++ is particularly useful in the implementation of complex mathematical objects, such as unstructured mesh, sparse matrix, and multigrid hierarchy, often used in numerical modeling. The well-debugged and tested code segments implement the numerical methods efficiently and transparently in a unified object-oriented approach.

This book is the result of 14 years working directly with people who have lost jobs, homes, financial freedom, and hope. "21st Century Keys to Employment" will guide you through the steps necessary to stand out from the competition to land that next job! "Due to the economy I was laid off from two executive-level positions in three years. After 6 months with no success in finding a new job, I was desperate. I attended Lynne's training program. Within 3 weeks I had three job offers in hand!" Robert "UNBELIEVABLE! My jaw dropped when I
