This book sets out to critically assess the strengths and weaknesses of Spain's Catholic identity in the early modern period. Traditionally the Spanish Church has been seen as a major bastion of orthodoxy and intolerance. Modern historians now see the Church as a much more complex and diverse institution in which tolerance and conservatism coexisted. The text provides evidence of the survival of multi-culturalism in Spanish society, the extent of innovative trends in religious scholarship, the partial nature of ecclesiastical reform, the vitality of popular religious culture and the shortcomings of the missionary enterprise overseas.

This wide-ranging and authoritative book fully synthesizes the French experience of religious change in the period stretching between the Reformation and the early Enlightenment.

Who can concentrate on thoughts of Scripture or philosophy and be able to endure babies crying ... ? Will he put up with the constant muddle and squalor which small children bring into the home? The wealthy can do so ... but philosophers lead a very different life ... So, according to Peter Abelard, did his wife Heloise state in characteristically stark terms the antithetical demands of family and scholarship. Heloise was not alone in making this assumption. Sources from Jerome onward never cease to remind us that the life of the mind stands at odds with life in the family. For all that we have moved in the past two generations beyond kings and battles, fiefs and barons, motherhood has remained a blind spot for medieval historians. Whatever the reasons, the result is that the historiography of the medieval period is largely motherless. The aim of this book is to insist that this picture is intolerably one-dimensional, and to begin to change it. The volume is focussed on the paradox of motherhood in the European Middle Ages: to be a mother is at once to hold great power, and by the same token to be acutely vulnerable. The essays look to analyse the powers and the dangers of motherhood within the warp and weft of social history, beginning with the premise that religious discourse or practice served as a medium in which mothers (and others) could assess their situation, defend claims, and make accusations. Within this frame, three main themes emerge: survival, agency, and institutionalization. The volume spans the length and breadth of the Middle Ages, from late Roman North Africa through ninth-century Byzantium to late medieval Somerset, drawing in a range of types of historian, including textual scholars, literary critics, students of religion and economic historians. The unity of the volume arises from the very diversity of approaches within it, all addressed to the central topic.

Womanist approaches to the study of religion and society have contributed much to our understanding of Black religious life, activism, and women's liberation. Deeper Shades of Purple explores the achievements of this movement over the past two decades and evaluates some of the leading voices and different perspectives within this burgeoning field. Deeper Shades of Purple brings together a who's who of scholars in the study of Black women and religion who view their scholarship through a womanist critical lens. The contributors revisit Alice Walker's definition of womanism for its viability for the approaches to discourses in religion of Black women scholars. Whereas Walker has defined what it means to be womanist, these contributors define what it means to practice womanism, and illuminate how womanism has been used as a vantage point for the theoretical orientations and methodological approaches of Black women scholar-activists. This is a study of the interrelationship between the history of the Christian Church in England and England's social history during the period of transition from medieval to modern society.

During the twentieth century, Britain turned from one of the most deeply religious nations of the world into one of the most secularised nations. This book provides a comprehensive account of religion in British society and culture between 1900 and 2000. It traces how Christian Puritanism and respectability framed the people amidst world wars, economic depressions, and social protest, and how until the 1950s religious revivals fostered mass enthusiasm. It then examines the sudden and dramatic changes seen in the 1960's and the appearance of religious militancy in the 1980s and 1990s. With a focus on the themes of faith cultures, secularisation, religious militancy and the spiritual revolution of the New Age, this book uses people's own experiences and the stories of the churches to display the diversity and richness of British religion. Suitable for undergraduate students studying modern British history, church history and sociology of religion.
