The Economics discipline at the University of Adelaide has a distinguished 100 year history of which the University and the State of South Australia can be proud. Very few other departments, of any discipline in Australian universities, could claim to have a majority of its lecturer appointments rising to full Professor status over a period as long as 1901 to 1995. Nor would many other university departments be able to say they have had five of their graduates win Rhodes Scholarships in the past 12 years.

This book is the first compilation of its kind that brings together discussions of the evolution of scholarship in different branches of the Social Sciences. It presents a comprehensive multi-disciplinary text exploring the changing dynamics of the Social Sciences in Ghana, offering a broader perspective from which to view the evolution, theory, methods, substance and relevance of each of the Social Science disciplines and their multiple interfaces. The introduction and the conclusion are devoted to the theoretical, comparative and empirical debate over the Social Sciences from historical and analytical perspectives. Written by acknowledged experts, the 15 chapters span the following disciplines: Archaeology and Heritage Studies; History; Geography; Psychology; Sociology and Anthropology; Social Work; Economics; Political Science; International Affairs; Information Studies; Communication Studies; African Studies; Development Studies; Women's and Gender Studies and Adult and Continuing Education. Changing Perspectives on the Social Sciences in Ghana offers sophisticated perspectives for comparing and appreciating the synergies, differences, trends and nuances among and between the Social Science disciplines in Ghana, in a holistic and scholarly manner.

For the Students of 2nd Semester and Annual Mode B.Com. (Honours) Delhi University This book is immensely useful for the students pursuing Economics from other Universities
