Probability Axioms 1. (Nonnegativity) $P(A) \geq 0$, for every event A . 2. (Additivity) If A and B are two disjoint events, then the probability of their union satisfies $P(A \cup B) = P(A) + P(B)$. More generally, if the sample space has an infinite number of elements and A_1, A_2, \dots is a sequence of disjoint events, then the probability of their union satisfies
