Mosler and Catley show Australia as migrant Americans see it, warts and all! Americans in the United States or in Australia as tourists have little bad to say

about Australia--but what happens when they actually live there? Are Australians grateful? Resentful? Are the Americans happy? Or do they want to go straight home? What do Americans and Australians really think of each other? Mosler and Catley provide many of the answers, relying on extensive survey data and personal opinions from the Americans themselves.

John Freeman was one of Britain's most extraordinary public figures for over half a century: a renaissance man who constantly reinvented himself; a household name who sought complete anonymity. From advertising executive to war hero to MP tipped to be Prime Minister, Freeman then changed direction to become a seminal television interviewer and editor of the *New Statesman*. He subsequently remodelled himself yet again to become, in turn, an ambassador, a TV mogul, a university professor and, finally, in retirement, a well-known bowls player in south London. Freeman packed nine lives into his ninety-nine years, but all he really wanted was to be forgotten. The paradox of this private celebrity was captured by the very series that made him famous: *Face to Face*. While Freeman remorselessly interrogated the stars of his age, he himself sat in the shadows, his back to the camera. He was the grand inquisitor, exposing the personalities behind the public figures - but never his own. For ten years, Hugh Purcell has been tracking Freeman's story, trying to come face to face with this enigma who believed in changing his life - and his wife - every ten years. Why did Freeman want to forget what most old men would be proud to remember? Why did he try to erase himself from history? And yet, despite Freeman's best efforts to be ignored, his death in 2014 was marked by an enormous outpouring of appreciation and admiration. With his life now free from its shroud of inscrutability, the true story of this incredibly multifaceted man can finally be told.

Coup de tat by the Gambia National Army, July 22nd 1994 is the authors autobiography chronicling the events of the title and its impact in his life. It is a story filled with lessons about Gambian history with a special focus on the genesis of the Gambian Military. For complexity, Lt. Col. Sarr alternated his story in the early chapters between scenes in the Gambia and his struggles to obtain political asylum in the United States of America. The book also revealed recollections from his childhood to educate his readers about certain social and spiritual beliefs and traditions in the Gambia. After the first few chapters, which set up the coup and established his thoughts about it, he further provided a detailed history of his personal life up to the time of his enlistment in the Gambia National Army. There he discussed his first days in the USA in the early 80s sequentially focusing on life in the Gambia before, during and after the coup. The book is intended to be instructive and educational to readers interested in, among other things, the background of the Gambia National Army and current APRC government headed by President Yaya A. J. J. Jammeh since July 22nd 1994.
