Warning: This book contains violence, excessive language, and strong sexual content. It's intended to be read by mature audiences. Part one of a two part series. There are three things Lily Evans immediately notices about her new neighbor, Jay Lincoln. The first is his monstrous size, the second is the malicious way he glares at her, and thirdly, but most importantly, the three scars that mark his right eye. She knows the smart thing to do is stay away, but she has never met or seen anyone like him. The more time she spends with this frightening yet captivating man, the harder it becomes. He can make her hairs stand on end but he also has a sweetness to him that tugs at her heart. Soon she finds herself merged into his world full of murder, revenge, and deceit.

This is a book about empathy and communication. Empathy - the ability to recognize other people's feelings and intentions - is an innate ability. To communicate - to participate in dialogue, seek contact, and engage in interaction with others - is an innate need. There is strong evidence that the ability to empathize is partially linked to a specific type of nerve cells in the brain. These cells are called "mirror neurons". Neurobiological research shows that the mirror neuron system makes it possible for us to replicate and recognize other people's feelings and intentions. The cells also affect our capacity for self-reflection. The innate potential for empathy in a human being can be developed early in a human being through the caregiver's ability to communicate, build a relationship, and meet the child's inner need for contact. The book describes a special communication tool, empathic communication, built on the understanding of communication which is described above.

The Art of Missing Link is a lushly illustrated volume that goes behind the scenes of LAIKA ' s new stop-motion adventure. The charismatic Sir Lionel Frost (voiced by Hugh Jackman) considers himself to be the world ' s foremost investigator of myths and monsters. The trouble is none of his small-minded high-society peers seems to recognize this. Sir Lionel ' s last chance for acceptance by the adventuring elite rests on traveling to America ' s Pacific Northwest to prove the existence of a legendary creature. A living remnant of Man ' s primitive ancestry. The Missing Link. Zach Galifianakis voices Mr. Link: the surprisingly smart, funny and soulful beast upon whom Sir Lionel ' s dreams depend. As species go, he ' s as endangered as they get; he ' s the last of his kind, and he ' s lonely. Proposing a daring quest to seek out his rumored distant relatives, he enlists Sir Lionel ' s help in an odyssey around the world to find the fabled valley of Shangri-La. Together with Adelina Fortnight (voiced by Zoe Saldana), an independent and resourceful adventurer who possesses the only known map to the group ' s secret destination, the unlikely trio embarks on a riotous rollercoaster of a ride. Along the way, our fearless explorers encounter more than their fair share of peril, stalked at every turn by dastardly villains seeking to thwart their mission. Through it all, Mr. Link ' s disarming charm and good-humored conviction provide the emotional and comedic foundation of this fun-filled family film. From LAIKA, the animation studio behind the Academy Award–nominated Kubo and the Two Strings, Missing Link is a stunning stop-motion epic and raucous comedy. Featuring concept art from the film ' s creation—including sketches, storyboards, character designs, and much more—and illuminated by in-depth interviews with the film ' s creative team, The Art of Missing Link is a must-have companion to the film.

Educators clamor to provide top-notch lessons and resources for students, but if students lack executive function, even the best materials won't produce the desired results. If students haven ' t developed the brain-based skills to focus, catch and correct errors, identify cause-and-effect relationships, and more, they can't make sense of lessons. Executive function is the missing link to student achievement. But how can you develop this in the classroom? In this new book, bestselling author Nancy Sulla has the answers. She explains how building executive function requires a combination of activities, structures, and teacher facilitation strategies aimed at six increasingly complex life skills that should be the goal of any school: conscious control, engagement, collaboration, empowerment, efficacy, and leadership. She also offers a variety of examples, activities, and structures fit for every grade level and subject area. With the book ' s practical strategies and tools, you will be inspired, armed, and ready to establish a clear framework for building executive function in all your students.
