Guide To Processing

The SparkFun Guide to Processing

teaches you to craft your own

digital artwork and even combine it

with hardware—no prior

programming experience required.

Over the course of the book, you ' ll

learn the basics by drawing simple

shapes, move on to photo editing

and video manipulation, and

ultimately affect the physical world

by using Processing with an

Arduino.

Processing is a free, beginner-friendly programming language designed to help non-programmers create interactive art with code.

The SparkFun Guide to Processing, the first in the SparkFun Electronics series, will show you how to craft digital artwork and even combine that artwork with hardware so that it reacts to the world around you. Start with the basics of programming and animation as you draw colorful shapes and make them bounce around the screen.

The SparkFun Inventor's Kit (SIK) is your map for navigating the waters of beginning embedded electronics. This guide contains all the information you will need to build five projects encompassing the 16 circuits of the SIK. At the center of this guide is one core philosophy: that anyone can (and should) play around with electronics.
